Important Hint.

Mr. J. H. Grier, who lives a mile north of this village, tells us that he has a son, who is now a resident at Union City, Tenn., who is a very fine fellow, and is very much interested in the fall of some hard substance, which he got one step and bounded off into the path. She thought it was a large ball, and went out and looked for it. It was close as a nail, he did not melt. In the dark the snow was blinding, and he was shown at a distance. A few days ago it was sent to him, and a jeweler pronounced it to be a diamond worth \$2,000.

Philosophy of Advertising.

First time a man looks at an advertisement he does not see it. The second time he does not notice it.

The third time he is dimly conscious of it.

The fourth time he faintly remembers something of the kind before.

The fifth time he half reads it.

The sixth time he turns up his nose at it.

The seventh time he throws the paper down impatiently.

The eighth time he ejaculates: "There's the confounded thing again."

The ninth time he wonders if there's anything in it.

The tenth time he thinks it might possibly suit somebody else's case.

The eleventh time he thinks he will ask his neighbor if he has tried it, or knows anything about it.

The twelfth time he wonders if the advertiser can make it pay.

The thirteenth time he rather thinks it must be a good thing.

The fourteenth time he happens to think it is just what he wanted.

The fifteenth time, for a long time, resolves to try it as soon as he can afford it.

The sixteenth time he examines the address carefully and makes a memorandum of it.

The seventeenth time he is tantalized to think he is hardly able to afford it.

The eighteenth time he sees painfully how much he is in need of that particular article.

The nineteenth time he counts his money to see how much he would have left if he bought it.

The twentieth time he rushes frantically forth and buys it.
